

NEW PROFESSIONAL-GRADE MOSQUITO AND TICK SPRAY

100% Natural

Natural Mosquito and Tick Control

Eco-friendly

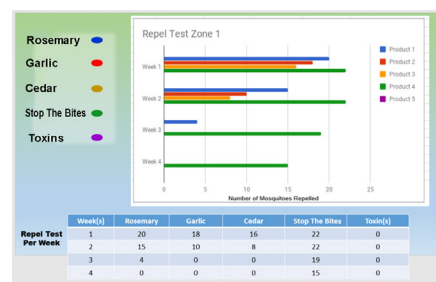

INTRODUCING THE FIRST ALL-NATURAL MOSQUITO AND TICK SPRAY THAT KILLS AND REPELS FOR UP TO FOUR WEEKS—RESULTING IN ZERO CALLBACKS.

Environmental and health concerns are growing at a rapid pace about the foods we eat, the products we use and the companies we allow to serve our families. The consumer is searching for products that are friendly to the environment, people and pets. In turn, the companies serving these consumers are in search of the same. Arkion Life Sciences has been producing products for the green market for the past 18 years. Our mission is to discover, develop and successfully market innovative products in the animal and human food industry—enhancing the quality of life.

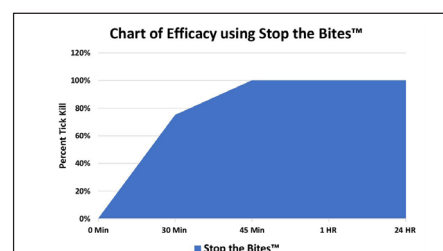

Arkion is introducing a brand-new 100% natural, professional-grade mosquito and tick spray—Stop the Bites™. This all-natural formula competes very effectively with dangerous neurotoxin sprays. We believe our new product will open up exciting new markets for the professional sprayer while protecting their existing customer base. Stop the Bites™ is just the latest addition to Arkion's specialty sprays line for commercial lawn and garden markets.

Stop the Bites™ is designed for the professional mosquito and tick sprayer who wants to offer an all-natural product. **Stop the Bites™ has been scientifically proven to kill 100% of pests and their larvae in one spray. This product has been tested at Mississippi State University's North Mississippi Research and Extension Center, and found it to have a 100% kill rate of mosquitoes and ticks within one hour of one application, also repelling pests for up to four weeks.** Stop the Bites™ has the same efficacy rate as neurotoxins—without the dangerous, toxic effects to the customer, the sprayer and the environment. Arkion believes this is the first highly effective, all-natural solution that is ideal for all of your pest-management needs.

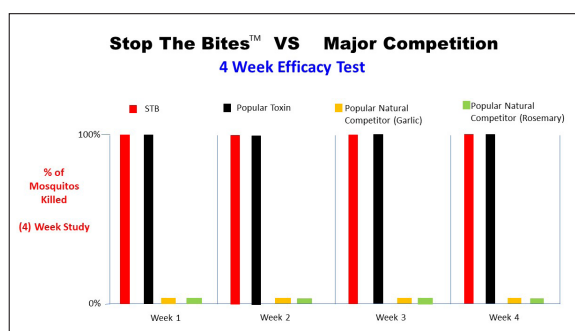

- Stop the Bites™ provides natural outdoor Mosquito and Tick control products directly to residential and commercial lawn care professionals.
- We offer a full line of natural mosquito and tick control products that are made in the USA. These products qualify for exemption from registration under section 25(b) of the Federal Insecticide, Fungicide and Rodenticide Act.
- The primary bugs controlled by our products are mosquitoes, ticks, fleas, ants, roaches and no-see-ums (midges).
- Stop the Bites™ products are the safest products to spray around people, animals and plants.
- We use a variety of other products within our proprietary blends, such as cedarwood oil, lemongrass oil, castor oil, corn oil, geraniol and sodium lauryl sulfate, that are blended together. This results in a complete pest control product that is a deterrent and a repellent, and that also disrupts future egg cycles.

MOSQUITO REPEL TEST

TICK KILL TEST

4 WEEKS OF EFFICACY

As the public becomes more mindful of the benefits of all-natural products like Stop the Bites™, the market for these products is rising by double digits. As parents, millennials and people by the masses are demanding more natural products be used—this product is a necessity for the commercial sprayer. **Stop the Bites™ kills and repels 100% of mosquitoes and ticks for up to four weeks, reducing the number of callbacks—saving the sprayer time and money.**
